International Journal of Fracture

CONTENTS OF VOLUME 96 (1999)

Vol. 96, No. 1, 1999

Evaluating stress intensity factors of a surface crack in lubricated rolling contacts	S.H. JU and K.C. CHA	1–15
Effects of interfacial damage on the global and local static response of cross-ply laminates	M. DI SCIUVA, U. ICARDI and L. LIBRESCU	17–35
The effect of strength mis-match on mechanical performance of weld joints	G. LIN, X.-G. MENG, A. CORNEC and K.-H. SCHWALBE	37–54
Damage dependent constitutive behavior and energy release rate for a cohesive zone in a thermoviscoelastic solid	CHONGHO YOON and DAVID H. ALLEN	55–74
Asymmetrical cracks parallel to an interface between dissimilar materials	TOSHIMITSU OTSU, WEN-XUE WANG and YOSHIHIRO TAKAO	75–100

Vol. 96, No. 2, 1999

Modeling and simulation of dynamic fragmentation in brittle materials	O. MILLER, L.B. FREUND and A. NEEDLEMAN	101–125
The effective fracture toughness in hydraulic fracturing	PANOS PAPANASTASIOU	127–147
Damage field ahead of a tensile crack in an elastic-plastic and viscoplastic material	KHALED M. MAHMOUD and MUMTAZ K. KASSIR	149–165
A complex variable boundary element method for solving interface crack problems	SHI JUN PING, LIU XIE HUI and CHEN YI HENG	167–178
Disappearance conditions of thermal stress singularities based on stress intensity in two and three-phase bonded structures	TADANOBU INOUE, MASAKI HOJO and SHOJIRO OCHIAI	179–201

Vol. 96, No. 3, 1999

Singularity characteristics for a lip-shaped crack subjected to remote biaxial loading	YU QIAO and YOUSHI HONG	203–214
Effect of mode-mixity on the fracture toughness of Ti-6Al-4V/FM-5 adhesive joints	HARI PARVATAREDDY and DAVID A. DILLARD	215–228
BEM implementation of the energy domain integral for the elastoplastic analysis of 3D fracture problems	A.P. CISILINO and M.H. ALIABADI	229–245
A strip yield analysis of fatigue crack growth in the residual stress field	G.S. WANG	247–277
Electric current-induced stresses at the crack tip in conductors	GARY X. CAI and F.G. YUAN	279–301

Vol. 96, No. 4, 1999

Higher order asymptotic solutions of V-notch tip fields for damaged nonlinear materials under antiplane shear loading	TIE-JUN WANG and ZHEN-BANG KUANG	303–329
A dislocation barrier model for fatigue limit – as determined by crack non-initiation and crack non-propagation	H.W. LIU	331–344
Dynamic crack propagation and unloading behavior of brittle polymers	K. ARAKAWA, D. NAGOH and K. TAKAHASHI	345–358
Optimizing the design of paticulate composites for maximum fracture resistance through modeling	D.L. DAVIDSON	359–370
On crack problem in an elastic ponderable layer	S.J. MATYSIAK and V.J. PAUK	371–380
The presence of edge contact and its influence on the debonding of patched panels	A.M. KARLSSON and W.J. BOTTEGA	381–404

International Journal of Fracture

CONTENTS OF VOLUME 96 (1999)

Vol. 96, No. 1, 1999

Compliance tensors of ellipsoidal inclusions	IGOR SEVOSTIANOV and MARK KACHANOV	L3–L7
Remarks on macrocrack - microcrack interaction and related problems	ASHER A. RUBINSTEIN	L9–L14

Vol. 96, No. 2, 1999

Determination of geometry-independent J-integral values of tough polymers	SABINE SEIDLER and WOLFGANG GRELLMANN	L17–L22
Application of two independent measurement techniques for determination of ductile crack growth initiation	Z. RADAKOVIC, GY. B. LENKEY, V. GRABULOV and A. SEDMAK	L23–L28

Vol. 96, No. 3, 1999

Energy release rate in piezoelectric media	SHI WEICHEN and ZHEN-BANG KUANG	L31–L36

Vol. 96, No. 4, 1999

J-Integral of dissimilar anisotropic media	SHI WEICHEN and ZHEN-BANG KUANG	L37–L42
A simple procedure for the estimation of local stress intensity factors for semi-elliptical surface cracks	THEO FETT	L43–L48
Volume contents / Author index		L49–L50
